

The Most Critical Step in Sterilization and Infection Control

Sonix IV ultrasonic cleaning systems provide the #1-rated cleaning performance in the industry.

- Quattro recess models are ideal for use in high volume/traffic operations at dental, medical, institutional, and government facilities.
- All Quattro models come with stainless steel mounting/containment flange and hinged cover, stainless steel basket, electronically operated pump, and remote mounted digital controller with temperature controls.
- Designed to accommodate the most demanding environments by utilizing an insulated double wall stainless steel tank design and features Sonix IV's proprietary WaveSweep technology.
- Quattro systems feature Sonix IV's MaxCav system design that integrates capabilities of the Sonix IV Acousti-Pulse Generators and PowerMass (60 Khz) Transducers, resulting in intense, high density cavitation for maximum cleaning results.
- High performance DSP processor provides adjustable linear power with over-heat and over-current protection for working stability and environmental suitability.

2/10 Warranty

- Acousti-Pulse Generators covered for 2 years
- PowerMass Transducers covered for 10 years

The Sonix4 Difference:
Hypercavitation

**Infinity System*

Special Features

- Infinity System -- 3-Stage UV recirculating pump filtration for utilizing chemical free cleaning with purified water.
- Remote digital DSP processor with independent controls for temperature and power intensity.

Product	Tank Dimensions in Inches	Liquid Capacity
QUATTRO-4	12 x 10 x 8	16.8 Qt / 4.2 Gal
QUATTRO-6	14 x 12 x 8	23.2 Qt / 5.8 Gal
QUATTRO-8	20 x 12 x 8	33.2 Qt / 8.3 Gal
