

### The Most Powerful Technology for Critical Cleaning

*Sonix 4 ultrasonic cleaning systems provide the #1-rated cleaning performance in the industry.*

- R-Type recessed models are ideal for general use in dental and medical practices with a moderate number of set ups.
- R-Type models range in capacity from 2.7 gallon to 7.8 gallon.
- All R-Type models come with a cabinet or wall mounted controller, stainless steel mounting/containment flange and hinged cover, push button drain, stainless steel basket.
- Each R-Type model features a remote mounted touch-pad control with light, medium, and heavy cleaning cycles as well as an auto-drain feature.
- R-Type systems feature Sonix 4's MaxCav system design that integrates capabilities of the Sonix 4 Acousti-Pulse Generators and PowerMass (60 Khz) Transducers, resulting in intense, high density cavitation for maximum cleaning results.

#### 2/10 Warranty

- Acousti-Pulse Generators covered for 2 years
- PowerMass Transducers covered for 10 years

The Sonix4 Difference:  
Hypercavitation
